Nursing Mothers Plan

Lifelong Transformation, One Healthy Habit at a Time®
Welcome to OPTAVIA!

At OPTAVIA, we believe you can live the best life possible and we know that requires a healthy you. We help you achieve lifelong transformation by incorporating healthy habits into everything you do. These habits get your mind and body working together, to work for you. Every simple new habit, every healthy decision, every positive change leads to more.

We also believe optimal health is about what’s added to your life, not what’s subtracted from the scale. During this important time in your life, we want to help you increase your health, confidence and vitality as a new mom! The OPTAVIA for Nursing Mothers Plan is designed for the nursing mother whose baby is at least two months old. We offer a nutritionally balanced plan that encourages gradual weight loss while supporting your body’s nutritional needs and encouraging the optimal growth of your nursing baby. Once your baby’s diet is less than 30% breast milk, talk to your independent OPTAVIA Coach. You may choose to continue with this plan or move to the Optimal Weight 5 & 1 Plan®, which has a greater calorie and carbohydrate reduction for more rapid weight loss.
Before You Begin

We recommend that you contact your healthcare provider before starting and throughout your OPTAVIA journey, especially if you are taking medications (e.g., diabetes medications, high blood pressure medications, Coumadin (warfarin), lithium, thyroid medications etc.).

MEDICAL DISCLAIMER:

The Company (“We”) recommends that you consult your healthcare provider prior to starting any weight loss program, and during the course of your weight loss program. Do NOT use any OPTAVIA® plan if you are pregnant or under the age of 13.

Before starting a weight loss program, talk with your healthcare provider about the program, and about any medications or dietary supplements you are using, including especially Coumadin (warfarin), lithium, diuretics, or medications for diabetes, high blood pressure or thyroid conditions. Do not participate in any OPTAVIA Program until you are cleared by your healthcare provider if you have or have had a serious illness (e.g. cardiovascular disease including heart attack, diabetes, cancer, thyroid disease, liver or kidney disease, eating disorders such as anorexia or bulimia), or any other condition requiring medical care or that may be affected by weight loss.

The OPTAVIA for Teens plan is the only OPTAVIA Program appropriate for teens (13 to 17 years of age). The Optimal Weight 5 & 1 Plan® is NOT appropriate for teens, sedentary older adults (65 years and older), nursing mothers, people with gout, some people with diabetes, and those who exercise more than 45 minutes per day – if you fall into one of these categories, please consult your healthcare provider and refer to www.OPTAVIA.com and talk with your independent OPTAVIA Coach about other OPTAVIA plans that may be appropriate. For special medical or dietary needs, including food allergies, refer to our program information online, consult your healthcare provider and talk to your OPTAVIA Coach. Do not consume an OPTAVIA product if you are allergic to any of that product’s ingredients which are listed on the product packaging and on the OPTAVIA website.

We recommend drinking 64 ounces of water each day. Consult with your healthcare provider prior to changing the amount of water you drink as it can affect certain health conditions and medications.

NOTE: Rapid weight loss may cause gallstones or gallbladder disease or temporary hair thinning in some people. While adjusting to the intake of a lower calorie level and dietary changes, some people may experience dizziness, lightheadedness, headache, fatigue, or gastrointestinal disturbances (such as abdominal pain, bloating, gas, constipation, diarrhea, or nausea). Consult your healthcare provider for further guidance on these or any other health concerns. Seek immediate medical attention if you experience muscle cramps, tingling, numbness, confusion, or rapid/irregular heartbeat as these may be a sign of a more serious health condition.

For avoidance of doubt, the OPTAVIA Programs and products are not labelled, advertised or promoted for any specific medicinal purpose, i.e. treatment or prevention, implied or otherwise, of any disease or disorder, including its related conditions.

The OPTAVIA programs, products, and any of its materials and/or information do not in any way constitute medical advice or substitute for medical treatment. As individuals may have different responses to dietary products or changes in diet, consult with your healthcare provider regarding any medical concerns.

For further information regarding this Medical Disclaimer, call Nutrition Support at 1.888 OPTAVIA or email at nutritionsupport@OPTAVIA.com.
Getting Started

OPTAVIA succeeds where other programs fail because we incorporate healthy habits in everything you do. Our plans are a good fit because they incorporate small meals every two to three hours, so carbohydrates and protein are spaced evenly throughout the day. And, all Fuelings are carbohydrate-controlled and generally lower in fat, making them a healthy choice for nursing mothers. As you begin, we encourage you to talk to your independent OPTAVIA Coach, who will help support you and steer you to success.

Getting started is simple and easy:
• Eat at least 1,500 - 1,800 calories per day, including three OPTAVIA Fuelings. While you’re nursing, you should not consume fewer than 1,500 calories per day.
• We recommend that nursing mothers start with the 1,500-calorie plan (see sample meal plans). If you lose more than one to two pounds per week or notice a decrease in your milk supply, switch to the 1,800-calorie plan. Some women may need even more than 1,800 calories each day.
• Refer to the food guide on the next page for foods and serving size options.

• 2 cups spinach topped with ½ cup tomatoes and ½ cup cucumbers and onions (mixed) with 1 Tbsp salad dressing
• ⅔ cup cooked whole-wheat pasta

Evening snack:
• ¼ cup strawberries dipped in 1 oz. dark chocolate
Healthy Tips for Nursing Mothers

• Drink 64 – 96 oz. (8 - 12 glasses) of fluids each day, most of it as water. Contact your healthcare provider prior to changing the amount of water you drink as it can affect levels of certain medications.

• Decrease your calories gradually to initiate weight loss without compromising your milk supply.

• Eat every two to three hours throughout the day to prevent hunger and overeating.

• When your healthcare provider says it’s appropriate, incorporate a moderate amount of exercise and physical activity each day. Exercise can help you stay healthy, strengthen your body, and nourish your spirit. Try to get out or a walk or a jog while pushing your baby in his or her stroller. Whether you choose aerobic exercise or strength training, start your program slowly, increasing intensity and duration as your body allows.

• Take a daily vitamin. As during your pregnancy, your healthcare provider may recommend a daily multi-vitamin or continuing your prenatal vitamin while nursing, so you can be sure you and your baby’s nutritional needs are met.

• Avoid alcohol and limit caffeine. Limit caffeine intake to fewer than 300 mg per day, which is the equivalent of about three eight-ounce cups of coffee.
The Optimal Health 3 & 3 Plan®

Continuing on your path toward optimal health

Once you’ve achieved your healthy weight, it’s crucial to maintain the good habits you’ve learned, including fueling your body every two to three hours. To help sustain your healthy weight, we’ve developed the Optimal Health 3 & 3 Plan. It focuses on nutritionally balanced small meals eaten every two to three hours, while integrating more food choices in the right portions.

Your independent OPTAVIA Coach can tell you more about the Optimal Health 3 & 3 Plan developed by our team of Registered Dietitians.

To follow the Optimal Health 3 & 3 Plan, consume three Optimal Health Fuelings daily and three balanced meals.
We're with you every step of the way
