# Six Steps to Optimal Health

## Your Steps to Integration

Our **OPTAVIA** Community provides encouragement and real answers along the path to health, confidence and vitality. It is all built on our innovative, six step approach that will enable you to reach your personal goals and help create your own foundation for achieving optimal health.

### The six steps are:

\*No one can predict how long you are going to live, but research suggests that making an overall lifestyle change by taking an active role in your choices and behavior, including losing weight, eating healthier, moving more and reducing stress, has the potential to help you live a longer, healthier life.

# The Optimal Weight 5 & 2 & 2 Plan

Our Optimal Weight 5 & 2 & 2 Plan is perfect for you if you prefer a flexible meal plan to help you reach a healthy weight. The Optimal Weight 5 & 2 & 1 Plan can meet the needs of a wide range of individuals.

## It is suitable for you if you:

- Want to incorporate all of the food groups, including fruit, dairy, and starches
- Have type 1 diabetes and are closely monitored by your healthcare provider
- Have type 2 diabetes and over 100 pounds to lose
- Are 65 years or older and not regularly active and/or have over 100 pounds to lose
- Exercise more than 45 minutes per day
- Have less than 15 pounds to lose

## It's as simple as this:

- Eat 5 Fuelings + 2 Lean & Green Meals + 2 Healthy Snacks
- Eat six times daily, once every two to three hours

While 5 & 2 & 2 does not add up to six, this guide will show you how you can plan your meals throughout the day and add variety, too! Each **OPTAVIA** Fueling has a nearly identical nutritional profile designed by our team of food scientists and refined by our Registered Dietitians and nutrition team. Each Fueling is scientifically formulated with the right balance of carbohydrates, protein and fat to help you achieve a healthy weight on the Optimal Weight 5 & 2 & 2 Plan. Each Fueling contains high-quality, complete protein which helps retain lean muscle mass.

Your **OPTAVIA** Coach can help you choose your Fuelings at the start, and you will soon discover your own favorites.

In addition to 5 Fuelings each day, you will learn another healthy habit, how to make a Lean & Green Meal for you and your family. You will begin to learn what optimal nutrition looks like and soon healthy eating will become second nature.

# What is a Lean & Green Meal?

A Lean & Green Meal includes 5 to 7 ounces of cooked lean protein plus three (3) servings of non-starchy vegetables and up to two (2) servings of healthy fats, depending on your lean protein choices. Enjoy your Lean & Green Meal any time of day – whatever works best for your schedule.

## Healthy Fats

Every day, incorporate up to two (2) servings of healthy fats into your Lean & Green Meal. Healthy fats are important because they help your body absorb vitamins like A, D, E and K. They also help your gallbladder work properly. Reference [page 20](#) to view our complete Healthy Fats List.

## Lean & Green Meal: The "Lean"

### Lean Tips:

- Portion size recommendations are for cooked weight.
- Choose meats that are grilled, baked, broiled or poached – not fried.
- Each week, try to eat at least two servings of fish rich in omega-3 fatty acids (salmon, tuna, mackerel, trout or herring).
- Feel free to choose any of our meatless options like tofu and tempeh.

If you are interested in our complete list of meatless options, please refer to our '[Vegetarian Information Sheet](#)' located on [Client Answers](#) (ANSWERS.OPTAVIA.com).

All vegetables promote healthful eating. But on the Optimal Weight 5 & 2 & 2 Plan, we eliminate the highest-carbohydrate vegetables (such as carrots, corn, peas, potatoes, onions, edamame and Brussels sprouts) to enhance your results. Once you've achieved your healthy weight, we encourage you to include ALL vegetables for long-term healthy eating.

# Healthy Snacks

On the Optimal Weight 5 & 2 & 2 Plan you may incorporate 2 servings of a starch, fruit, dairy, or **OPTAVIA** Snack into any of your meal times. While 5 & 2 & 2 does not add up to six, remember to keep your meals at six per day, spaced two to three hours apart, for optimal blood sugar and hunger control. We recommend choosing a variety of foods from the categories below throughout each week. Variety is an integral part of healthy eating.

## Starch

**A healthy snack serving of starch is:**

- 1 slice whole-grain bread (3g or more fiber/slice)
- 2 slices low-calorie, light, whole-grain bread (about 40 calories/slice)

- $\frac{1}{2}$  cup fresh or frozen fruit

## The Optimal Health 3 & 3 Plan

### Continuing your path to optimal health.

Once you have transitioned off of the Optimal Weight 5 & 2 & 2 Plan and achieved your healthy weight, it's crucial to maintain the good habits you have learned. To help you sustain your healthy weight, we have developed the Optimal Health 3 & 3 Plan.

This plan focuses on nutritionally balanced, small meals eaten every two to three hours, like our Optimal Weight Plans, while integrating more food choices in the right portions. It's easy to follow the Optimal Health 3 & 3 Plan, just consume 3 Optimal Health Fuelings and 3 balanced meals daily. If you choose to replace an Optimal Health Fueling with one of your favorite **OPTAVIA** Fuelings used during weight loss, remember to include an additional Healthy Exchange item from the list starting on [page 27](#).

Your independent **OPTAVIA** Coach can tell you more about the Optimal Health 3 & 3 Plan developed by our team of Registered Dietitians. Remember, your **OPTAVIA** Coach is there to help steer you to success and celebrate your journey!

Ready? Let's get started.

# The Optimal Health 3 & 3 Plan in Three Easy Steps

## Step 1

**Calculate your Total Energy Expenditure (TEE), which is the number of calories you burn each day.**

Visit our '[Optimal Health 3 & 3 Program](#)' webpage located under the 'Products & Programs' section of [OPTAVIA.com](#) for our total energy expenditure calculator. The Optimal Health 3 & 3 Plan takes a common sense approach to sustaining a healthy weight based on balancing your food intake with the calories you burn. Remember, increasing your activity is also an important part of maintaining a healthy weight.

**Recommended readings:** Part 2.8 in *Dr. A's Habits of Health, Second Edition* and Element 14 in *Your LifeBook*.

## Step 2

**Choose your meal plan based on your TEE.**

When you know what optimal nutrition looks like, healthy eating becomes second nature. Our registered dietitians have developed a variety of meal plans ranging from 1,200 - 2,500 calories. Visit our '[Program Guides & Information Sheets](#)' section on [OPTAVIA Client Answers \(ANSWERS.OPTAVIA.com\)](#) to view our '[Optimal Health 3 & 3 Plan Sample Meal Plans](#).'

## Step 3

**Familiarize yourself with the plan's food groups, which include fruits, dairy, starches, proteins, fats and vegetables.**

To add variety, select foods from the 'Healthy Exchange List' as substitutions. You can also have one Free Choice each day. All of the food and beverage options in the 'Healthy Exchange List' are approximately 100 calories and can also be used as a "Free Choice". Our healthy exchange list of options can be found on next few pages of this guide.

**Need help?** If you need help calculating your TEE and getting started on the Optimal Health 3 & 3 Plan, contact your **OPTAVIA Coach** or our Nutrition Support team at 1.888.OPTAVIA or [NutritionSupport@OPTAVIA.com](mailto:NutritionSupport@OPTAVIA.com) for more information.

# Healthy Exchange Options

We know not everyone has the same taste buds, so we've created a Healthy Exchange resource to help you choose the foods you like and work them into the Optimal Health 3 & 3 Plan! We list a variety of food options with serving sizes around 100 calories and 15g of carbohydrate or less. You will also find recommended serving sizes for alcohol and sweet treats that can occasionally be incorporated into your Optimal Health 3 & 3 Plan as the "Free Choice."

The best path to optimal health includes eating a well-balanced diet with a variety of:

- Fruits
- Low-fat dairy foods
- Lean protein
- Whole grains
- Healthy fats
- Vegetables

The amounts of food you will eat from each food group depends on the number of calories you burn each day (i.e. your total energy expenditure). If you haven't already, work with your **OPTAVIA** Coach to calculate your total energy expenditure, and then use our list of Healthy Exchanges to help create balanced meals.

**Recommended readings:** Part 2.3-2.6 in *Dr. A's Habits of Health, Second Edition* and Elements 08-09 in *Your LifeBook*.

# Healthy Exchange List

*Note: The Healthy Exchange List is designed specifically for the Optimal Health 3 & 3 Plan. The options listed are not suitable substitutions for OPTAVIA Fuelings during the weight loss phase of the program.*

\* High in Sodium.

### Tips for Protein:

- Choose the leanest cuts of beef, such as round steaks and roasts (eye of round, top round, bottom round, round tip), top loin, top sirloin and chuck shoulder and arm roasts.
- Select the leanest pork choices, such as pork loin, tenderloin, center loin and ham.
- Choose extra lean ground beef that is labeled at least 90% lean.
- Buy skinless poultry, or remove the skin before cooking. Choose skinless chicken breast and turkey cutlets for the leanest options.
- Choose low-sodium lean turkey, roast beef or ham for sandwiches instead of processed deli meats such as bologna or salami.
- Trim away all of the visible fat from meats and poultry before cooking.
- Skip breading on meat, poultry or fish.
- Include fatty fish (salmon, mackerel, herring, lake trout, sardines and albacore tuna) at least two times a week for heart-healthy omega-3 fatty acids.

Starch	
Amount	Food
1 slice	Bread
2 slices	Reduced-calorie bread
½	Pita, 6 inches in diameter
1	Tortilla, 6 inches in diameter
¼	Naan, 8 inches by 2 inches
1 small	Roti/chapatti, 6 inches
1 piece	Matzoh
½	English muffin, hamburger or hot dog bun
1	Mini bagel
½ cup	Hot cereal, cooked (oatmeal, cream of wheat)
¼ cup	Oat bran

3 cups	Air-popped popcorn
6	Crackers
2	Rice cakes
15 (¾ oz.)	Baked chips (potato, tortilla, pita)
¾ cup	Hominy, canned

### Tips for Starches:

- Substitute a whole-grain product for a refined product such as whole-wheat bread instead of white, brown rice instead of white, whole wheat pasta instead of white, etc.
- Try sweet potatoes with the skin on instead of white potatoes for more nutrients. They can be cooked in the microwave in minutes.
- Choose beans and lentils for extra protein and fiber. Soak dried beans overnight to reduce cooking time.
- If you're choosing canned, be sure to rinse through a colander to remove excess sodium.
- Experiment by substituting whole-wheat or oat flour for up to half of the flour in pancakes, waffles, muffins or other flour-based recipes.
- Use whole-grain bread or cracker crumbs instead of white bread crumbs.
- Try rolled oats or a crushed, unsweetened, whole-grain cereal as breading for baked chicken, fish, veal cutlets or eggplant parmesan.
- Try an unsweetened, whole-grain, ready-to-eat cereal as croutons in a salad or in place of crackers with soup.
- Foods labeled with the words "multi-grain," "stone-ground," "100% wheat," "cracked wheat," "seven-grain" or "bran" are not always whole-grain products.
- Color is not an indication of a whole grain. Bread can be brown because of molasses or other added ingredients. Read the ingredient list to see if it is a whole grain.
- Use the Nutrition Facts label, and choose whole-grain products with a higher % Daily Value (% DV) for fiber. Many, but not all, whole-grain products are good or excellent sources of fiber.
- Read the food label's ingredient list. Look for products without added sugars (such as sucrose, high-fructose corn syrup, honey, malt syrup, maple syrup, molasses or raw sugar) that add extra calories.
- Look for 100-calorie sandwich rolls, often labeled "rounds," "flats" or "thins".

## Healthy Exchange List (cont.)

Fats			
Amount	Food	Amount	Food
2 tsp	Oil (any type)	1 Tbsp	Tahini
1 Tbsp	Nut butter	2 Tbsp	Seeds (sesame, sunflower, flax)
12	Almonds	1 Tbsp	Chia seeds
12	Cashews	2 slices	Bacon, cooked
20	Peanuts	½ cup	Light coconut milk
32	Pistachios	2 Tbsp	Cream cheese
1-2 Tbsp	Salad dressing	¼ cup	Guacamole
2 tsp	Butter or margarine	1 ½ Tbsp	Pesto
4 Tbsp (2 oz.)	Avocado	2 Tbsp	Baba ghanouj
16-20	Olives (large)	2 tsp	Ghee

### Tips for Fats:

- Use small amounts of fats, which provide essential nutrients.
- Choose oils over solid fats. All fats and oils are a mixture of saturated fatty acids and unsaturated fatty acids. Solid fats contain more saturated fats and/or trans fats than oils. Saturated fats, trans fats and cholesterol tend to raise LDL (bad) cholesterol levels in the blood, which increases the risk for heart disease.
- Select mostly polyunsaturated (PUFA) or monounsaturated (MUFA) fats. Oils are the major source of MUFAs and PUFAs in the diet. PUFAs contain essential fatty acids, so named because they are necessary for health.
- Include nuts, seeds, nut butters, tahini, olives and avocados, which provide protein and/or fiber, so they may be more satiating.

Non-starchy Vegetables	
Amount	Food
½ cup cooked vegetables or vegetable juice	Artichoke hearts, asparagus, baby corn, bean sprouts, beans (green, wax Italian), beets, broccoli, Brussels sprout, cabbage (green, bok choy, Chinese), carrots, cauliflower, celery, chayote, cucumber, daikon, eggplant, leafy greens (collard, kale, mustard, turnip), hearts of palm, jicama, kohlrabi, leeks, mixed vegetables (without corn, peas or pasta), mung bean sprouts, mushrooms (all kinds), okra, onions, peppers (all varieties), radishes, rutabaga, salad greens (chicory, endive, escarole, lettuce, romaine, arugula, radicchio, watercress, etc.), sauerkraut*, spinach, squash (summer, crookneck, zucchini), sugar snap peas, Swiss chard, tomatoes, tomato/vegetable juice*, turnips, water chestnuts
1 cup raw vegetables	

\* May be high in sodium.

### Tips for Non-starchy Vegetables:

- If you eat 3 cups or more of raw vegetables or 1 ½ cups of cooked non-starchy vegetables in a meal, count them as 1 Healthy Exchange option.
- Canned vegetables may have added salt. Look for low-sodium or no-salt-added varieties when possible. Drain and rinse canned vegetables to remove excess salt.
- Starchy vegetables such as corn, peas, potatoes and winter squash have more calories and carbohydrates, so they are listed on the Starch List.
- Keep washed, cut raw vegetables such as carrots, cucumber, broccoli, radishes, celery, bell peppers and cherry tomatoes on hand regularly.
- Add chopped or pureed vegetables to sauces, soups, stews and casseroles.
- Incorporate raw or lightly cooked vegetables, such as spinach, tomatoes and onions, into sandwiches, omelets, stir fries and pasta or rice dishes.
- Aim to fill half of your plate with non-starchy vegetables at meals. They are low in calories and provide a great source of fiber, vitamins and minerals.
