WHERE DO YOU FIT IN?

Body Mass Index (BMI) is the measure of health and fitness endorsed by the Surgeon General of the United States. It takes into consideration the height and weight of a person to give an accurate index of what his/her weight should be. A BMI of up to 25 is considered healthy. Any number between 25-29 means the person is overweight. A reading between 30-39 is an indication of obesity, placing the individual at high risk of developing heart disease, high blood pressure, diabetes, and other ailments. A reading of 40+ is an indication of extreme obesity, placing a person at highest risk of health problems.

BMI Below 25
Healthy Weight

Potential candidate for the **OPTAVIA** lifestyle with Fuelings and Snacks to support Optimal Health.

BMI 25-29
Overweight

At high risk to develop cardiovascular disease, diabetes, etc. Potential candidate for one of the Optimal Weight Plans & **OPTAVIA** lifestyle.

BMI 30-39
Obese

At higher risk to develop cardiovascular disease, heart disease, diabetes, etc., without intervention. By choosing the **OPTAVIA** lifestyle you can return to a healthy weight and achieve lifelong transformation, one healthy habit at a time®.

BMI 40+
Extremely Obese

At highest risk to develop cardiovascular disease, heart disease, diabetes, etc., without intervention.
